## **ELECTRICAL DATA**

Supply voltage	1~230 V	Pui
Mains frequency	50 Hz	
Power input max.	21 W	Liq
Speed max.	3500 rpm	Am
Insulation class	F (155 °C	Por
Current max.	0.2 A	Pip
Protection class	IP44	Рге
Thermal protection		Cor
Frame size		Ma
Motor IE class		рге

### INSTALLATION

Pumped liquid	water VDI 2035, glycol 40%
Liquid temperature	-10.0 ÷ 110.0 °C
Ambient temp.range	40 °C
Port-to-port length	180 mm
Pipe connection	25
Pressure rating	G 1 ½
Connection	G 1 ½
Max operating	1.0 MPa
pressure	

### MATERIAL

Bearing	ceramics
Impeller	Noryl 1630V
Hydraulics	gray cast iron
Shaft	ceramics

Electrical wiring

979523850 NMT PLUS / Electronically regulated circulating pump Heating/cooling, Klimatizacija

NMT PLUS 25/40-180 is high-efficiency pump with three-stage regulation for heating systems, air conditioning installations and other circulation systems (circulation is ensured by New Motor Technology - NMT), with screwed connection and integrated electronic power control. The built-in electronics measures the converted pressure and flow values and thus automatically adjusts the duty point according to the set operating mode.

#### Main features:

- high performance permanent magnet electronically commutated motor (ECM)
- proportional-pressure operating mode
- constant speed operating mode
- · built-in electric protection
- easy installation and quiet operation
- · automatic air venting function

For normal operation of the pump, it is necessary to use a working medium consisting of clean water or a mixture of clean water and glicol in accordance with current water quality standards for heating systems, for example the German standard VDI 2035. If the glycol content in the working medium exceeds 20%, it is recommended to check the pump parameters Temperature range at an ambient temperature of +25 °C: +2...+110 °C, at ambient temperature +40 °C: +2...+95 °C.

Operating point:
• Flow: 0 m3/h

• Head: 0 m

Pressure and flow tolerances according to ISO 9906-2015.

Electrical data:
• Voltage: 1~230 V

Maximum current: 0.2 A

### Installation data:

• DN: 25

• Installation length: 180 mm

• Net weight: 2.45 kg

The pump is available with threaded (PN10) connection. The hydraulic pump housing is made of gray cast iron, protected by a cataphoresis coating, which makes the pump more resistant to the environment. The rotor can is made of one piece without welding, the rotor cladding is made of AISI 316 stainless steel, the pump shaft is made of . The impeller is made of synthetic material reinforced with glass fiber PES GF30. The bearings are made of ceramics.
